

I am against HB1171 because it would make it Unconstitutional and illegal to criminalize sex between minors and adults. It specifies "every person", (not just adult persons), as an essential component of the "individuals", (not just adult individuals), right to liberty and equality and has the fundamental right to reproductive liberty includes the right to make and effectuate decisions regarding the individuals own reproduction including, but not limited to, the ability to prevent continue or end their pregnancy likewise enshrining reproductive rights into law. Further, if you can't afford an abortion the MD State taxpayers will pay for it (a violation of many religious people who are against abortion, effectively forcing them to participate in the abortion and child abuse acts through their unwilling monetary contributions towards the processes.) This bill allows people from out of state to use the same money and get an abortion as well... compounding the problem. This creates a taxpayer supported abortion sanctuary state where child molesters can take their victims to kill the child, funded and paid by the State of Maryland and all residents, a safe-haven for raping and killing children.
