

To whom it may concern,

This bill goes beyond being objectionable because it proposes to remove laws currently in place that provide protection for our children and youth (statutory rape laws and age of consent laws). Without the statutory rape laws and age of consent laws that are currently in place, not only would victims of rape have no legal recourse, but the absence of those laws would legalize statutory rape. The things being proposed in this bill have nothing to do with offering true liberty, and everything to do with the destruction of society.

Sincerely,

Martin Best
