

This bill is a disgrace. The wording of this bill would discount the statutory rape age, parental knowledge, and the life of any child involved in the act of reproduction (whether active or as a result). Research shows that the human brain isn't fully developed until age 25 but this bill would allow children at any age to make decisions they deem fit in regards to reproduction - having sex and keeping a baby (they they likely cannot afford nor know how to effectively parent), having sex and terminating the pregnancy (killing an innocent baby - no one cares about that life), or sterilization (which could lead to mental health issues later in life). Please do not pass this bill. I'm not sure who it's aiming to please, but whomever it is, especially a child, will likely suffer mental health repercussions from whatever decision they make. This is one "freedom" that should have limitation - age, morals, and common sense.
