

HB1171 - Declaration of Rights – Right to Reproductive Liberty

Thank you for taking the time to read my testimony. This bill has elements that will enable the corruption of our society in ways too numerous to fully draw out in one simple paragraph, but let me highlight my main concerns. Any law that restricts the fundamental rights of another person is by its nature invalid. Just as we cannot make a law that allows the murder of a class of individual, a law that negates another individuals rights ceases to be valid. Consider the rights of a small child or a single woman who might be sexually assaulted as a result of this laws language that would allow perpetrators to claim it was their 'right' by virtue of the law you're considering. Worse yet is the very real possibility that your intentions will be twisted into a malice worse than we can articulate. My sincere request is that you confidently vote NO to this law and sleep well knowing you have prevented innumerable acts of evil.

- Tim Morrison
