

This bill is so anti-child, anti-person, pro-abortion, pro-eugenics, and so anti-family. It encourages government paid abortions for anyone female old enough to get pregnant. It completely removes parental consent, parental notification of what is happening with their child and allows and encourages females to make a life and death decision for the baby when they may not even have the mental maturity or wisdom to make an important life-changing decision. It is vile, evil and shows the worst that human nature has to offer. We have government to protect such people, not to “hang them out to dry.” This bill is so vile it should die in committee and never again see the light of day.
