

As a Primary Care Nurse Practitioner and a Psychiatric Mental Health Nurse Practitioner student, I **strongly** urge you to defeat HB 1171! This bill will further denigrate children and women at the hands of human traffickers by allowing no age limits to abortion services. Human traffickers will have free reign to bring in minors for abortions without any hindrances to their enslavement of these victims. Traffickers can be stopped or at least deterred by requiring parental consent. One sexually trafficked victim shared her story of how her nightmare might have come to an end much sooner, **IF** the clinic was required to notify her parents. At least the police would have known where to start searching for her. I have cared for numerous victims of sexual abuse. The trauma of those experiences dominates their adult lives. The flashbacks and nightmares they experience make normal, productive lives nearly impossible.

**DO NOT SUPPORT THIS BILL!!!**
