Members of the House of the Maryland General  
Assembly:

I am writing this letter/testimony to ask you not to vote this horrific proposed bill into law. This law would give no protection to minors who have been raped and then forced to have an abortion by the same person that raped them! These children would have no protection under the law in this bill. If this bill is passed, you will be placing young children and teenagers in grave peril from child predators and serial molesters. In other words, you would be placing our children into the hands of the worst of humanity. I am appalled that this bill got through your state senate. You can do your part to help our children by voting against this disgusting and horrible bill. Thank you.

Sincerely,

Margaret Robertson
