

HB1171 Proposed Law is abhorrent because it would make Abortion a Constitutional Right in Maryland. The unborn child's basic human right to LIFE would be violently destroyed. The proposed law eliminates the criminality of statutory rape and eliminates parental consent requirement for obtaining an abortion and other serious actions. It would make all these procedures payable with tax dollars even though a major portion of taxpayers strongly object to providing them on well informed moral grounds. I strongly recommend that this law not be passed.
