

TESTIMONY IN FAVOR OF SENATE BILL 503

Maryland Medical Assistance Program – Doula Services – Coverage

Before the Senate Finance Committee

By Stephanie Klapper, Deputy Director, Maryland Citizens' Health Initiative, Inc.

February 22, 2022

Chair Kelley and Members of the Senate Finance Committee, thank you for this opportunity to testify in support of Senate Bill 503. We thank Senator Lam for sponsoring this important legislation.

Thanks to the great work of the Maryland General Assembly, Maryland is one of the leading states for health care. However, there is still more to do. While maternal mortality rates are improving in Maryland, disparities persist. Black Marylanders die at a rate that is four times higher than their white counterparts of pregnancy or child-birth related complications.¹ Research suggests that community-based doulas can help improve birth outcomes and reduce disparities.² Codifying the Maryland Medical Assistance Program Doula Program will help underserved Marylanders survive and thrive during the pregnancy and post-partum period.

Thank you again to the Committee for your recognized efforts toward improving access to quality, affordable health care for all Marylanders. This bill will help Maryland remain a leader in health care. We urge a favorable report from the Committee on Senate Bill 503.
