

HB 1171 - Please don't even consider this to be something that the people of your state or any other state want to be made available to anyone. This is just terrible thinking on someone's part. The bad situations that could come out of this are something that most people don't want

To hear about. People's lives are on the line, living breathing people, and poor innocent children that are not born yet that have no one to speak up for them. Abortion is murder, taking the life of another life is wrong just wrong. People go to jail for years for taking another life how would this be different?

Many tax paying citizens don't agree with abortions and certainly don't want their tax dollars to go for paying for them.

Please consider this bill and how many people it would affect, how many innocent people this could affect.

Whatever your goal it - this will not work. Re-word it to be very specific for what you really want, not to be so vague that so many innocent people could be hurt. Then when you re-word it, tear it up. No one wants it!!!
