

This bill is beyond an egregious threat to children. In essence, you are giving pedophiles from all over the country the green light to come to Maryland with their underage victims for free abortions. By specifically omitting age from your bill, you will be aiding and abetting child rapists. If children of any age are going to be granted "abortion" rights with no parent consent, are they not also entitled to vote, drink, and drive at any age as well. How can you sanction giving them the right to make medical additions that will irrevocably alter their lives? You are in the process of creating a cesspool. Stop. This is beyond evil. It is intolerable that any country pretending to be "free" would not protect its youngest and most vulnerable.
