

This bill, by making "reproductive liberty" a constitutional right in Maryland, makes sex between adults and minors a constitutional right. This is because "person" is never define as just adults, thus leaving the door open for minors to be legally groomed and sexually abuse by adults. Therefore not only does this bill establish killing pre-born children as a constitutional right in Maryland, but this bill is also a pro-ephebophilia and pro-pedophilia bill, as it essentially eliminations age of consent laws.

Three other problems that this bill would allow for:

- It would allow for is minors to make serious decisions in regards to abortion and even sex reassignment surgery without parental consent.
- It would allow for other people out-of-state (including potentially sex traffickers) to get free abortions in Maryland.
- It would force the Maryland taxpayer to help pay for all these reprehensible things.

Given all this it is my hope that this bill will not pass Maryland's General Assembly.
