

This is my testimony concerning Bill 1171

Allowing adults, to have access to young children, adolescents and teens, to satisfy their sexual desires is well known to cause great harm to children.

I come from a family where abuse occurred. It has caused great devastation to me, my siblings and even into the next generation. As a result of the abuse, we do not have pleasant memories and no real relationships; we have not all been together at the same time, for more than 50 years.

My goal in life is to get healing for myself and to help guide our adult children to seek healing.

This abuse is evil. It has no place in a healthy society. Abused people are not healthy in mind, body and spirit.

The only reason to allow this bill to pass and go on to the ballot, is to destroy what little healthy society we have left.

Vote “NO!” on Bill 1171.
