

Bill 1171 is an unethical bill because it is the parent's rights over the child, instead of the random stranger who wants to rape their child. The parent's rights are as simple as this: My child, My Rights, my authority to protect the child. The rapists should be punished, and the child doesn't even want to be with the rapists but they're too scared to say so. You are taking away the parent and child's constitutional rights by passing this bill. This is not a reproductive rights bill; this is a bill gone rogue against the constitution.
