

My name is Steve Bress. I urge you to vote in favor of HB1292.

Vaccination does not mean immunization. Discriminating based on vaccination status in all cases makes no sense. As to the school situation which HB1292 addresses, there should be no discrimination at all. This does not even raise to the level of separate but equal, as those who are unwilling or unable to comply with what is essentially a mandate, have no equal activity on which to fall back.

The current situation is teaching the children to comply or be left out of society. Children should never be taught that discrimination and segregation is something to which they should meekly comply.

Please support HB1292.
