

HB 1082 Public Health-Consumer Health Information-Hub and Requirements

As the President of the Maryland State Dental Association Charitable and Educational Foundation I SUPPORT HB1082. It is an important step in the success of improving health and quality of care by creating simple easily understood language for informed health care decisions caused by systemic barriers to care. This dovetails well in my opinion with the current Oral Health Taskforce creating a synergetic evaluation of inequities. Its programs should assist the Maryland State Dental Association Foundation in our mission of promoting good oral health. Communication is critical to the advancement of usable knowledge and participation in programs available to the public.

I ask for a FAVORABLE REPORT for HB1082.

Thank You

Dr Thomas R. a'Becket
