

House bill 1171 would require someone, who firmly believes the science, namely that a human being, unique in his or her DNA, is created and begins to mature at fertilization, would have to participate in the killing of that innocent human being, as an OB/GYN, a physicians assistant, or a nurse.

Additionally, that bill would require my tax money to be complicit in the killing of an innocent human being, that is unconscionable for legislator to enact something like that.

This bill goes against national polls which show that people are opposed to abortion on demand up to birth, is this what the free state wants to be known for, killing more children than any other state?

Let's not forget that black children are aborted three times as often as white children, which goes back to exactly what Margaret Sanger desired.

Bills such as this may force Catholic hospitals to close, wow, what a mess that would be? I think unless you were willing to stop by a hospital upon a vote for this bill and watch a newborn child struggle for breath and food after having been the result of an abortionist's 'error', well absent that, the only way for this bill is having it soundly defeated.

Thank you for your attention.
