I am in opposition to this bill because a good portion of the bill is aimed at expanding abortion coverage by insurance companies and providing such insurance to 'young adults', those 18 through 40. That of course is the age at which most women procure abortions. Or shall I more correctly state, they are pushed onto an abortion by boyfriends, parents, and this type of legislation. Where is legislation that will assist these women into options that will help them continue their pregnancy?

Why are you requiring 'Abortion' be called 'Abortion Care'? Let's call a spade a spade. There are two individuals involved and it is the death of one, and that is not 'Care'.

Why are we spending state money to destroy our states potential, its children?
