

I do NOT support HB0610, and neither should you. Please stop encouraging well and able-bodied citizens to be dependent and reliant on the government. We do NOT need universal health care programs from the state; we have enough of this junk coming from the federal government. Please stop wasting everyone's time with this nonsense. Instead, you should be encouraging people to get a job with health benefits. You should be supporting small businesses in providing reasonably priced health benefits to their employees. People can take care of themselves if the government would step out of their way. UNFAVORABLE for HB0610.
