

## HB1189 FAVORABLE WITH AMENDMENTS

According to Federal HHS, the reporting requirements for COVID-19 vaccines are the same for those authorized under emergency use or fully approved. Healthcare providers who administer COVID-19 vaccines are [required by law](#) to report certain adverse events to VAERS.

The problem is there is no enforcement or penalty for NOT reporting to VAERS.

**I respectfully request amending the bill to have a penalty for not reporting the adverse events.**
