

UNfavorable – SB0682

vince mcavoy po41075 baltimore md

Delegates,

Please vote unfavorable on SB0682/HB746

Sixty Minutes, The Wall Street Journal, Church Militant and other researching news programs have been posting pieces about the harm, the irreversible damage done to children and adults by transgender operations.

As I expressed in House Testimony in HGO Committee in 2022 here

<https://mgahouse.maryland.gov/mga/play/bb1c84fe-3b9e-4dcd-8f1c-81d9c6251b8c/?catalog/03e481c7-8a42-4438-a7da-93ff74bdaa4c&playfrom=13317000>

this is due to payola and graft driving those who are under the pay/influence/coercion of Planned Parenthood and select corrupt Maryland State medical officials (as was detailed on the House Floor just last week).

Dangers of the transgender movement well-documented

“More than half of transgender male teens who participated in surveys have reported attempting suicide in their lifetime...29.9% of transgender female teens said they had attempted suicide... nonbinary youth, 41.8% of those tested stated that they have attempted suicide at some point of their lives...is the embodiment of self-hatred...[suicide rate] are off-the-charts high.”

<https://youtu.be/iPLY2SqK7UE?t=240>

What should be of interest to the House HGO is that only 2 years ago, the outcomes of transgender re-assignment were presented in an amicus to the U.S. Supreme Court, noting an “increased psychiatric hospitalization, a sharp increase in mortality as well as criminal convictions, with transgenders 19 times more likely to kill themselves.”

Trans Industry Profiteering

This fad is being promoted by Planned Parenthood, according to Wall Street Journal reporter Abigail Shrier, for profit through hormone treatment, bloodwork, and other opportunities for profit. <https://youtu.be/2SPHcVP4sJw?t=48>

Church Militant, expounding on research and reporting by The Wall Street Journal, reported on the financial ties which are allowing this payola to continue.

Here’s the statement::

“Transgender kids are a cash-grab for Planned Parenthood”

Due to the foul and derisively confrontational manner of several on the HGO Committee – and people talk, lady delegates driving the Transgender Train – due to this foul manner of pushing

this issue in HGO, this corruption is never for a moment investigated locally, reported on locally or stopped. It should be. Because were it to come out that this is being financially- and ideologically- driven, this penchant for mass-mutilation of children in Maryland under the auspices of foul lies to children and young adults would cease.

The idea that it is the task of Maryland or the Maryland's medical complex to create a glamorous, movie-star, fictitious version of the vision a mentally ill person has in their head is monstrous and delusional. If 7-year-old girls see a Disney movie and suddenly mermaids are all the rage, ask yourselves "If a child identified as a mermaid, would we tolerate a doctor amputating her legs"?

This is a cosmetic bill for a sexual and mental deviancy. These children are being coerced and misled into cutting their own bodies through false promises. If the cuts were done on the outside instead of cosmetically, it would be clear to all that this bill aims to cut, to mutilate our state's children. How flawed must your soul be to go along with cutting children & stealing their biological ability to be a mother or to be a father?

To disregard the known consequences and ignore rightful projections related to the unintended consequences of misleading, lying as well as sexually & physically manipulating Maryland's own children for the benefit of an extremely small, child-amputating sector is wrongful.

LEAVE OUR CHILDREN ALONE!

Church Militant Reporting

Transgender kids are a cash-grab for Planned Parenthood — this, according to a post last week by Abigail Shrier, a journalist and author on transgenderism in children.

Shrier cites a former Planned Parenthood staffer — unnamed in the article — who disclosed how the abortion giant profits from giving male hormone treatments to underage girls. The former employee observed transgender kids will keep returning to Planned Parenthood for hormone treatment, blood work, and so on — giving the company multiple opportunities for profit.

The specific abortuary where the employee worked had a so-called "gender counselor" on staff — a person with little medical training who had gone through transgender transitioning.

Planned Parenthood's website touts its offerings in so-called "trans health care."

Shrier: "So the puzzle is why, out of nowhere in the last decade, have we seen a sudden and sharp spike of teenage girls who have no childhood history of gender dysphoria suddenly deciding they're trans, often with their girlfriends?"

Shrier, a writer for the Wall Street Journal, has been sounding the alarm about pushing transgenderism in teens. Her book (published last year), *Irreversible Damage*, is a dire warning about gender dysphoria in teenage girls.

Shrier: "And for the first time in history, it's overwhelmingly affecting teenage girls."

She claims teen girls will start identifying as male due to various factors, like mental health problems and social pressure.

Shrier: "And it happens to be the very same population that finds themselves in the grips of every other hysteria from anorexia, multiple personality disorders; these, you know, these things that girls magnify in each other by spreading their pain."

Giving testosterone to an underage girl has a slew of negative long-term side-effects, including heart-attacks, infertility and endometrial cancer.

Pro-trans leftists have tried to cancel Shrier and those who give her a platform, but have been unsuccessful so far.

Shrier: "They self-diagnose. They say, 'No, no, I know it's my problem.' They don't have a mental health professional who says, 'Oh wait a second, hold on. You have very high anxiety, depression — you have a lot of other mental health stuff going on. Let's deal with that first.'"

LGBT activists continue pushing for transgenderism in children despite a higher rate of suicide and numerous other mental and physical health risk
