

Written Testimony for Support of HB779

I am writing to you today as a life-long residents of Maryland. The COVID virus is past us however I support the delegates and this bill to ensure that science is followed when making decisions about public health. Naturally immunity has been recognized over the history of mankind. Why would we treat this viral illness any differently?

Recognizing natural immunity ensures that people are not discriminated against based on medical status. Especially when we know that the vaccines are not stopping transmission or infection. Why would Maryland promote discrimination? Why would Maryland continue the narrative that we all know is false?

Do the right thing for Maryland. Support this bill and vote favorably.
