

HB0181 Declaration of Rights - Religious Freedom, Religious Tests, and Oaths and Affirmations – OPPOSE

I strongly oppose this bill because it is solely based on control. There are laws of the universe the main one of which is the basis for all others and that is “That which we create, we control.” Our government, this legislative body did not create us. No actually it was the other way around – We The People created the government! And this concept has recently been forgotten.

And in 2020 when the man in the position titled Governor made himself emperor he broke his oath of office and he believes he is now in control of We The People. And this legislative body is falling lockstep right in line with that thinking. You cannot control what you did not create! You might get away with it for a short time, but it will end with the government’s demise.

I was created by God, and therefore I am already free! Taking God out of our legislation removes that reminder that the people, and this is ALL people are created by God and therefore only God controls us and therefore ALL People are already FREE!

It doesn’t matter which religion someone practices, those who believe in God include all religions and all beliefs in that belief that We are ALL created by God. No other belief system is inclusive as this is. This belief in God is already inclusive and therefore the legislation is already correct. It doesn’t need to be changed, and any other wording excluding God will eliminate this very basic and extremely important concept that is also supported by the laws of the universe That We the People being created by God are controlled by God and only by God! We are already free!

This nation and this state were formed on this basic principle and on the desire to be able to freely practice our beliefs and worship freely. Remember we are already free! It is only government that tries to control us and that is the basis of our founding – to be free from the tyranny of the governments. And here it is not long after winning that fight we find ourselves fighting our governments again for our rights. Passing this bill and removing God from the wording will take us back to the pre-Constitution days, to the days where government is again attempting to control us. Little

by little this government keeps chipping away at our rights, those rights given to us by the highest deity of all – God! You take that out of the wording and this concept will be quickly forgotten by this government.

I'm strongly opposed to this legislative action! And you are going to get great deal of resistance to it! But don't you dare think you can just table it for later when We the People aren't looking! No – You move this bill forward and you vote on it in 2022!! You stand up for God NOW while we are watching so that we know WHO is willing and who is not willing to stand up for God when it comes time for the elections.

Sincerely,

Nelda Fink
