

HB 1292

Favorable

I support HB1292.

At no time should anyone be treated in a discriminatory or unequal manner based on their medical or vaccination status. At no time should individual entities be able to create their own discriminatory policies, singling out anyone for unfair treatment. Fear or ignorance is not valid reason for discrimination. As we have seen with much Covid policy, science nor data were the consistent driver of policy making. This should never happen again.

Sincerely,

Kathy Talbott
