

Why do you have to enshrine a Constitutional right to kill an unborn human being with a beating heart? Please stop and honestly think about this. Babies should die because they are unplanned, inconvenient or unwanted by their parents???? Babies should die because it is a "reproductive health" choice or to protect womens mental health???? Both are lies! We have become a culture of death and for those in favor of HB0626 (who are actually reading this) should be ashamed! When you die one day, you will be held account of your actions and guaranteed that God will ask you why you were complicit in the killing of human beings and not advocating for something life-affirming for BOTH mother AND child! Woe to you who vote for death over life, darkness over light, lies over truth and evil over goodness.
