

HB1189

Public Health - Vaccines Administered Under Emergency Use Authorization - Reporting of Adverse Events

Jennifer Rauhofer

Favorable

I support this bill. Based on the documents that Pfizer has been required to make public along with the existing reporting of adverse events in VAERS, requiring health care providers to report adverse events occurring after the administration of a vaccine is imperative. Data has shown the the VAERS system is significantly underreported and making it a requirement will help us better understand how these vaccines impact some people.
