The Maryland Network Against Domestic Violence (MNADV) is the state domestic violence coalition that brings together victim service providers, allied professionals, and concerned individuals for the common purpose of reducing intimate partner and family violence and its harmful effects on our citizens. **MNADV urges the House Health & Government Operations Committee to issue an unfavorable report on HB 1230.**

Between 6-22% of women terminate their pregnancies because they're in an abusive relationship.<sup>1</sup> One of the most common reasons why survivors struggle to leave their abuser is because they have children in common. When a survivor is denied an abortion, they remain tethered to their abusive partner, whereas survivors who choose to terminate an unwanted pregnancy have a reduced risk of experiencing violence over time.<sup>2</sup> Additionally, survivors frequently experience forms of abuse that put them at an increased risk for unintended pregnancy, such as birth control sabotage, sexual assault, and reproductive coercion.<sup>3</sup> 2.1 million women in the U.S. have become pregnant as a result of rape by an intimate partner,<sup>4</sup> and, in one study, 16% of survivors with rape-related pregnancies chose to get an abortion.<sup>5</sup> Access to abortions can be a matter of life or death for survivors of domestic violence because experiencing abuse while pregnant puts survivors at a much higher risk of being killed by their abuser.<sup>6</sup>

Due to the power and control dynamics of domestic violence a victim could be in danger of more violence from their abuser or possibly even death if they are prevented from accessing the medical care they need. This bill serves to further restrict access to full healthcare services which will negatively impact survivors of intimate partner violence, possibly putting them in greater danger.

For the above stated reasons, the **Maryland Network Against Domestic Violence urges an unfavorable report on HB 1230.**
