

HB1021 Public Safety – Licensed Firearms Dealers – Security Requirements

Please have an Unfavorable report on this bill

This is a over broad regulation that will only seek to limit who can become an FFL (Firearms Dealer) based on poorly defined terms. It doesn't differentiate between types of Dealers Class 3 vs. Class 7 which are vastly different. The safety requirements will be highly costly and likely put many places who have large inventories out of business as they will not have the capability to follow the guidelines. Guidelines which are not clearly defined, and could mean different things to different people.
