

BILL NO: Senate Bill 387
TITLE: Public Safety - Untraceable and Undetectable Firearms
COMMITTEE: Judiciary
HEARING DATE: March 23, 2022
POSITION: **SUPPORT**

The Maryland Network Against Domestic Violence (MNADV) is the state domestic violence coalition that brings together victim service providers, allied professionals, and concerned individuals for the common purpose of reducing intimate partner and family violence and its harmful effects on our citizens. **MNADV urges the House Judiciary Committee to issue a favorable report on SB 387.**

Maryland law currently prohibits certain persons from owning or possessing firearms including when previously convicted of certain crimes, when under a civil protective order, or pursuant to an Extreme Risk Protective Order. Since “ghost guns” bypass the background check process and are unregulated and untraceable, the otherwise prohibited persons can legally obtain fully functioning firearms. SB 387 seeks to ensure that these “ghost guns” are traceable and that existing law apply to owners and dealers of these weapons.

Senate Bill 387 would require a serial number for unfinished frames or receivers for firearms. Currently the sale of these unfinished frames or receivers are unregulated and they are a necessary component to build a “ghost gun.” These “ghost guns” can be purchased online, built at home, are untraceable because they lack serial numbers, and circumvent the entire background check and training required for other firearms. SB 387 does not prohibit “ghost guns” it merely requires that they be subject to the already existing requirements for gun ownership in Maryland law.

Higher rates of firearm ownership correlate to a higher rate of domestic violence homicide according to a 2019 study.¹ There is a 65% higher incidence rate of domestic firearm homicide in the states with the highest firearm ownership compared to states with lower ownership rates.² Since women are the most common victims of domestic violence homicide, they are most at risk with increased gun ownership.³ Black women are disproportionately the victims of domestic violence homicide with a firearm with an

estimated 51.3% of Black adult female homicides found to be related to intimate partner violence.⁴ The risk of homicide for women increases by 500% with the presence of a gun in the home.⁵

For the above stated reasons, the **Maryland Network Against Domestic Violence** urges a **favorable report on SB 387**.
