Please support HB 0196 sponsored by Delegate Thiam. It makes so much good sense to publish a catalog of library materials for students, parents, and the general public to see.

Transparency is so valued and precious. It would be great to see the variety of options available. Families have struggled to get through these last few years with Covid 's heavy impact. Everyone should be able to see and access all these materials so students can do their best.

Thank you for your time and attention.
