House Bill 911

Maryland Clean Energy Center - Climate Technology Founder's Fund – Establishment

Date: March 14, 2023

Position: **SUPPORT**

To: House Appropriations Committee

From: Matt Stegman,
Maryland Staff Attorney

Chesapeake Bay Foundation (CBF) **SUPPORTS** HB 911 which creates the Climate Technology Founder’s Fund within the Maryland Clean Energy Center. This fund will be used to provide early-stage funding for new companies focused on developing technologies that mitigate the impacts of climate change.

Climate change is affecting the Chesapeake Bay and rivers and streams across the watershed—adding more stress to a system still out of balance. Water and air temperatures are increasing, putting both wildlife and people at risk of dangerous heat and worsening the Bay’s low-oxygen dead zone. Sea levels are rising at a rate nearly twice the global historic average, causing damage to habitat and property. And record-breaking storms are becoming more common, washing more pollution into rivers and the Bay.

The urgency of our climate situation requires an “all hands on deck” approach that includes investment and innovation from both the public and private sectors. HB 911 will provide a source of state investment to help foster private innovation in the field of climate technology.

CBF urges the Committee’s FAVORABLE report on HB 911.
