To Whom it May Concern,

As a founding member of the Maryland Center for Construction Education and Innovation (MCCEI) and a company with deep roots in the State of Maryland, we are united in MCCEI's mission to connect our state's diverse population with the vast and rewarding opportunities in the built environment.

MCCEI is an organization working tirelessly to spotlight and advance the wonderful opportunities and tremendous impact that built environment careers have on our communities. We proudly support the proposed funding increase for the continuation of their critical work to drive innovation and promote education for these essential services to our state and industry.

Very Truly Yours,
The Whiting-Turner Contracting Company

Timothy J. Regan
President and CEO
