## **SB 595 – Gaming – Problem Gambling Fund – Table Game Fees and Distribution of Sports Wagering Proceeds**

**Committee: Budget and Taxation**

**Date: March 8, 2023**

**POSITION: Support**

**The Maryland Coalition of Families:** Maryland Coalition of Families (MCF) helps families who care for a loved one with behavioral health needs. Using personal experience, our staff provide one-to-one peer support and navigation services to family members with a child, youth or adult with a mental health, substance use or gambling challenge.

---

At Maryland Coalition of Families we see first-hand the damage that problem gambling can do to a family. Therefore we are in strong support of SB 595, which requires that 1% of the proceeds from sports wagering be distributed to the Problem Gambling Fund.

Each time the State of Maryland has expanded legalized gambling in the last 15 years, the General Assembly has established a new funding stream to ensure that problem gambling education, prevention, and treatment were available for anyone experiencing problems that accompany gambling. A fee was assessed for slot machines. A fee was also assessed for casino table games. **But no such effective funding stream accompanied the state’s expansion into sports wagering.**

When the General Assembly legalized sports wagering in Maryland, it specified that any funds that were not claimed 182 days after the wager is won would go to the Problem Gambling Fund. However, with more than 90% of people placing their sports bets online, there are no unclaimed prizes. Unlike lottery tickets where a winner has to go to a retailer to claim their prize, the payout when a person places a bet online goes directly into the account the player established with the sportsbook operator. As a result, Maryland has effectively expanded gambling without increasing funds for the Problem Gambling Fund to help Marylanders.

The 2020 Maryland Gambling Prevalence Study showed that there was an increase in problem gambling prevalence among Maryland residents from 2017-2020, rising from 0.7% to 3.1%.<sup>1</sup>

Nationwide, the risks for gambling addiction grew by 30% after states were given authority to legalize sports wagering.<sup>2</sup> There is little doubt that the incidence of problem gambling will continue to grow with the expansion to sports betting.

This bill will ensure that adults who choose to place sports bets will have the education to keep themselves safe when they do it. We urge a favorable report on Senate Bill 595.

## **Written Testimony in Support of SB 595 (2023)**

### Gaming – Problem Gambling Fund – Table Game Fees and Distribution of Sports Wagering Proceeds

*Before the Budget and Taxation Committee: March 8, 2023*

#### **Introduction**

Senate Bill 595 is designed to increase funding for the State’s Problem Gambling Fund, which supports Marylanders who struggle with problem gambling. To increase funding, the bill: 1) requires that 1% of the proceeds from sports wagering be distributed to the Problem Gambling Fund, and 2) imposes an annual fee of \$500 for each table game to be paid by each video lottery operation licensee and distributed to the Problem Gambling Fund. This testimony explains why, with the recent legalization of mobile sports wagering in Maryland, increasing the amount of dedicated funding towards those suffering from problem gambling is more important than ever.

#### **The Number of Marylanders Suffering from Problem Gambling is Increasing**

The 2020 Maryland Gambling Prevalence Study showed that there was an increase in problem gambling prevalence among Maryland residents from 2017-2020, rising from 0.7% to 3.1%.<sup>1</sup> This increase was despite the 2020 survey being administered during the early stages of the COVID-19 pandemic when all of Maryland’s casinos and horse tracks were closed to the public. Of note, 35% of respondents listed sports wagering as their primary form of gambling. This was before sports wagering was legalized.

#### **Legalizing Sports Wagering is Proven to Exacerbate the Problem**

According to the National Council on Problem Gambling (NCPG), the risks for gambling addiction grew by 30% from 2018 to 2021.<sup>2</sup> This timespan is significant since 2018 is the year that the Supreme Court decided *Murphy v. National Collegiate Athletic Association*, which overturned the Professional and Amateur Sports Protection Act.<sup>3</sup> As a result of this decision, there is no longer a federal prohibition on states allowing sports wagering.<sup>4</sup> While Maryland does not yet have gambling data that includes legalized sports wagering, the problem gambling helpline has seen an increase in calls related to sports wagering. This trend is consistent with other states that have legalized sports wagering. New Jersey has reported a nearly 200% increase

in total problem gambling helpline calls and a nearly 500% increase in helpline calls about online sportsbooks.<sup>5</sup> In Connecticut, calls to the problem gambling helpline have increased by an average of 125%.<sup>6</sup> In the Midwest, calls to the problem gambling helpline in Michigan have increased by 171% since sports wagering was legalized.<sup>7</sup> NCPG believes these increases are likely due to the 24/7 access to sports wagering and “live” wagering that shortens the lag between the bet and reward, increasing the speed and frequency of gambling.<sup>8</sup>

### **Dedicated Problem Gambling Funding is Vital to Mitigating the Ramifications of Sports Wagering**

Sports wagering is currently live and legal in 33 states and Washington D.C., and legal but not yet operational in 3 more, while 8 states currently have sports wagering bills in pending legislation.<sup>9</sup> Of the 34 jurisdictions with live and legal sports wagering, more than half have included dedicated funding to problem gambling services in their sports wagering legislation. Virginia and Pennsylvania are leading the way when it comes to using sports wagering revenues to dedicate funding to problem gambling services. Each of these jurisdictions has explicitly placed provisions in their sports wagering legislation that mandate funding of problem gambling services. Both provisions provide for percentage amounts of sports wagering revenue to be allocated to problem gambling services. Virginia significantly increased problem gambling funding through the enactment of sports wagering legislation to increase the State’s per capita spending on the public health issue.<sup>10</sup> The nationally recommended best practice is to dedicate 1% of revenue from legalized sports wagering to problem gambling services.<sup>11</sup> In one study, a significant correlation was found between the amount spent on problem gambling services in a

state and the number of problem gamblers treated in that state.<sup>12</sup> States across the country are including dedicated problem gambling funding in their sports wagering legislation because they clearly understand the impact that funding can have on the treatment and prevention of problem gambling, and Maryland should follow suit.

### **Conclusion**

It is clear that with sports wagering being rapidly legalized throughout the country, the prevalence of problem gambling will only continue to increase. Legislation is the most effective way that the State can dedicate funding to problem gambling treatment and prevention services. If the General Assembly does not act, the state will not have the proper resources to prevent problem gambling and treat Marylanders already suffering from this devastating and oft-overlooked addiction.

RE: SB 595 – Gaming – Problem Gambling Fund – Table Game Fees and  
Distribution of Sports Wagering Proceeds

Dear Chair Guzzone:

This letter is in strong support of *Senate Bill 595 – Gaming - Problem Gambling Fund - Table Game Fees and Distribution of Sports Wagering Proceeds*. This bill requires each video lottery operation licensee to pay an annual \$500 fee for each table game for distribution into the Problem Gambling Fund. This bill also diverts 1% of the proceeds from sports wagering in the State Lottery Fund to the Problem Gambling Fund.

The Maryland Center of Excellence on Problem Gambling (the Center) is fully funded by the Problem Gambling Fund (PGF) to promote healthy and informed choices regarding gambling and problem gambling through public awareness, training and education, prevention, technical assistance to the behavioral health care system, peer recovery support, research, and public policy. The Center, which began operation on July 1, 2012, was created in response to legislation in 2008 that expanded legal gambling opportunities in the State. In recognition that problem gambling is an addiction just like substance use disorder, and access to 24/7 casino gambling will inevitably cause a subset of Marylanders to suffer from this addiction, the PGF was established to provide support for problem gambling treatment, prevention, public awareness, helpline services, and research. While sports wagering is relatively new in the state, here is a simple snapshot of what the Center has experienced in the past few months.

The money the Center receives from the funding streams this bill creates will go towards activities such as:

- More robust counter-marketing campaigns to combat the billions of dollars sportsbooks spend on advertising each year.
- More support for the more than 400 people across the state looking for help at any given time.
- Increased training opportunities to bring more providers into Maryland's no-cost treatment network.
- Public awareness campaigns to targeted special populations such as veterans, especially those with PTSD who experience a 60% higher rate of gambling addiction than the general population.<sup>i</sup>

In creating the PGF in 2008, the General Assembly has already recognized that dedicated problem gambling funding is necessary when increasing gambling access. The Center now comes to you to continue this trend by providing meaningful funding for sports wagering so that all of the programs funded by the PGF can continue to meet the expanding needs of Marylanders. The Maryland Center of Excellence on Problem Gambling urges a favorable report on SB 595.

Sincerely,

# **NCADD-MD - 2023 SB 595 FAV - Problem Gambling Fund**

Uploaded by: Nancy Rosen-Cohen

Position: FAV

**Senate Budget & Tax Committee  
March 8, 2023**

**Senate Bill 595  
Gaming – Problem Gambling Fund –  
Table Game Fees and Distribution of Sports Wagering Proceeds  
Support**

NCADD-Maryland supports Senate Bill 595. Each time the State of Maryland has expanded legalized gaming in the last 15 years, the General Assembly has seen fit to ensure a funding stream to address the problems that accompany gambling. A fee was assessed for slot machines. A fee was also assessed for casino table games. But we neglected to add an *effective* funding stream with the expansion into sports wagering.

When the General Assembly legalized sports wagering in Maryland, it specified that any funds that were not claimed 182 days after the wager is won would go to the Problem Gambling Fund. However, with more than 90% of people placing their sports bets online, there are no unclaimed prizes. Unlike lottery tickets where a winner has to go to retailer to claim their prize, the payout when a person places a bet online goes directly into the account the player established with the sportsbook operator. Again, unlike a small portion of lottery winnings, online prizes never go unclaimed. There are zero dollars in unclaimed funds for the vast majority of sports wagering in Maryland.

This has resulted in an expansion of gambling without the accompanying resources to address the problems. And the problem is growing. The latest gambling prevalence study conducted in Maryland in 2020, showed a substantially higher prevalence than in the surveys conducted in 2017 and 2010. There is little doubt that the incidence of problem gambling will continue to grow as we make it easier for people gamble in many different ways.

In addition to directing 1% of sports wagering revenue to the Problem Gambling Fund, Senate Bill 595 requires each video lottery operation licensee to pay an annual \$500 fee for each table game to support the Problem Gambling Fund. This is important because casinos have removed other table games and slot machines to make room for their sportsbooks. This has resulted in a reduction of funding for the Problem Gambling Fund. The reduction has meant Maryland has been investing less in the resources to help Marylanders suffering the harms of this addiction. This fee increase will allow those programs funded by the Problem Gambling Fund to continue working at their usual capacities.

We urge a favorable report on Senate Bill 595.

*The Maryland Affiliate of the National Council on Alcoholism and Drug Dependence (NCADD-Maryland) is a statewide organization that works to influence public and private policies on addiction, treatment, and recovery, reduce the stigma associated with the disease, and improve the understanding of addictions and the recovery process. We advocate for and with individuals and families who are affected by alcoholism and drug addiction.*

RE: SB 595 – Gaming – Problem Gambling Fund – Table Game Fees  
and Distribution of Sports Wagering Proceeds

Dear Chair Guzzone:

The Maryland Council on Problem Gambling strongly supports *Senate Bill 595 – Gaming – Problem Gambling Fund – Table Game Fees and Distribution of Sports Wagering Proceeds*.

This bill has two parts. First, it requires each video lottery operation licensee to pay an annual \$500 fee for each table game for distribution into the Problem Gambling Fund (PGF). This is important because casinos have removed table games and VLTs to make room for their sportsbooks so the PGF has seen a reduction in its normal funding amount. The reduction has meant Maryland has been investing less in the resources to help Marylanders suffering the harms of this addiction. This fee increase will allow those programs funded by the PGF to continue working at their usual capacities.

Second, this bill directs 1% of the proceeds from sports wagering in the State Lottery Fund to the PGF. When HB 940 (2021) legalized sports wagering in Maryland, it specified that any funds that were not claimed 182 days after the wager is won would go to the PGF. An unforeseen problem is that upwards of 90% of people place their sports bets online therefore, the PGF sees no funding from those mobile sports bets. In retail sports wagering, players receive tickets that they must redeem if they win. Much like a Lottery ticket, players have 182 days after a wager has settled to claim their prizes. If they don't, the money goes to the PGF. Conversely, when someone places an online sports bet and wins, the payout goes directly into the account the player established with the sportsbook operator, so online prizes never go unclaimed. All of this means, the revenue that the General Assembly anticipated going into the PGF is substantially less than expected; \$0 in unclaimed funds for the vast majority of sports wagering in Maryland. This provision will correct that unexpected error so that Maryland can be more adequately funded to support those who need help.

For these reasons, I urge a favorable report on SB 595.

Shandra Parks, Ph.D, LMSW  
President, Maryland Council on Problem Gambling
