

Testimony for SB0590
Renewable Energy Portfolio Standard - Eligible Sources - Alterations (Reclaim Renewable Energy Act of 2023)

Bill Sponsor: Senator Lewis Young

Committee: Education, Energy, and the Environment

Position: FAVORABLE

The undersigned organizations express their strong support for **SB0590 Renewable Energy Portfolio Standard - Eligible Sources - Alterations (Reclaim Renewable Energy Act of 2023)** and thank the sponsor, Senator Lewis Young, for introducing such an important piece of legislation.

The General Assembly has worked hard to position our state to achieve a clean energy future. However, one of the most important ways to achieve that future is to end subsidies to businesses that produce dirty energy. Subsidizing those businesses is not in our best interest, and it will make it much harder to achieve the greenhouse gas reductions that we seek.

This bill will remove all of the dirty energy sources from our Renewable Energy Portfolio. We are in a climate crisis, and we cannot afford to be spending any money on facilities that pollute. Not only is it wasteful to subsidize businesses that continue to pollute, it makes it harder to meet the greenhouse gas reductions that are required to reduce the harm caused by climate change.

This bill will eliminate three types of energy from Maryland's RPS: trash incineration, woody biomass, and factory farm methane gas. All three of these pollute the environment, harm nearby communities' health, and contribute to climate change. Subsidizing them takes money away from the real renewable energy that we need, and it also tilts waste markets toward the worst methods of managing our waste. We should be subsidizing businesses that do not pollute the environment, like wind and solar power, and let the waste sector work on managing waste.

We support this bill and we urge a **FAVORABLE** vote from the committee.
