**HB 94 Vehicle Laws - Speed Limits – Establishment
FAVORABLE
House Environment and Transportation Committee
February 2, 2023**

Good afternoon Chair Barve and members of the House Environment and Transportation Committee. I am Priscilla Kania, AARP Maryland volunteer lead advocate and resident of Anne Arundel County. AARP is the largest membership organization in Maryland representing those who are 50 and over. AARP Maryland has over 850,000 members. AARP Maryland supports HB 94 and we thank Delegates Lehman, Foley, Palakovich-Carr, and Terrasa for sponsoring this important legislation.

HB 94 expands (to apply statewide) the existing authorization for Montgomery County and municipalities within the county to decrease the maximum speed limit to no less than 15 miles per hour (MPH) on a highway after performing an engineering and traffic investigation. As with the current authorization, a locality is prohibited from implementing a new speed monitoring (i.e., speed camera) system to enforce speed limits on any portion of a highway for which the speed limit has been decreased pursuant to this authorization.

AARP Maryland believes every jurisdiction and Baltimore City should have the ability to change driving speeds. Everyone should feel safe crossing a street. But the streets can be dangerous, especially for older Americans. The number of pedestrians killed by vehicles rose 35 percent in the past decade—and the death rate is almost twice as high for people over 75 as for the general population. Making streets safe has been an important issue for AARP. AARP Maryland advocates for everyone, including pedestrians, bicyclists, motorists, and transit riders of all ages and abilities to have Safe Streets. Case in point, last week a 74 year-old bicyclist was killed in a hit and run right here in Anne Arundel County.

Walking and bicycling promote physical and mental health for all ages. Walking is the second most popular means of getting around (after driving.) Many communities are not designed to promote walking and bicycling. Residential areas are often far from commercial facilities. Sidewalks are often nonexistent or in poor condition. Crosswalk signals are often not timed for the slower pace of older pedestrians. Unsafe conditions for pedestrians are most pronounced in lower-income communities and communities of color. Older adults are also overrepresented in deaths involving people walking.

Communities are increasingly seeking to address road safety. AARP Maryland believes states should adopt and fully implement complete streets/safe streets policies to enable

safe access for users of all ages and abilities. This includes pedestrians, bicyclists, motorists, and public transit users.

AARP Maryland respectfully asks the Committee to issue a favorable report on HB 94. If you have any questions, please contact Tammy Bresnahan at tbresnahan@arp.org or by calling 410.302.8451.
