

Hello, I support Sunday hunting on both public and private land in Worcester County. As a private property owner in Worcester, with sufficient acreage to support safe hunting, I think the decision should be mine to make about days to hunt. Folks who wish to hunt public land, that they, as taxpayers, have paid for, should be able to use this land as they please. A large portion of hunters work Monday through Friday and often part of Saturday and are blocked from using the public lands. A lot of Worcester Forest land is owned by the State and should be open to Sunday hunting. Sunday hunting would also have more people in the area spending money with our local businesses. This bill should be passed. Thank you.
