**HB253 - Environment - On-Farm Composting Facilities - Permit Exemption**

**DATE:** February 15, 2023  
**COMMITTEE:** House Environment and Transportation Committee  
**POSITION:** Favorable  
**FROM:** The Office of Frederick County Executive Jessica Fitzwater

As the County Executive of Frederick County, I urge the committee to give **HB 253 - Environment - On-Farm Composting Facilities - Permit Exemption** a favorable report.

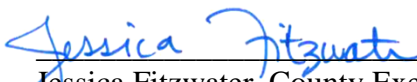

This bill expands the footprint of on-farm compost facilities with an MDE-issued permit from the current 5,000 square feet or less to 40,000 square feet or less if the facility meets other conditions for a permit exemption.

Current regulations allow on-farm compost facilities to operate without an MDE-issued permit within specific limits, including a footprint of 40,000 square feet or less for most feedstocks, but within a footprint of only 5,000 square feet for food residuals. This limitation hamstring farmers who would otherwise be able to incorporate food scraps into existing composting operations and assist in state-wide efforts to divert food waste from landfills.

Frederick County's permitting and land use policies allow for limited food waste composting as an agricultural activity up to 5 acres without a site plan approval or up to 10 acres for commercial activity with a site plan approval. Our Food Waste Composting zoning ordinance was updated in 2018 to help streamline the process and make food waste composting more accessible for our local farmers. The changes proposed in HB 253 would support this effort to reduce barriers for food waste composting.

HB 253 would benefit the farming community and the environment by diverting food waste and expanding composting opportunities.

Thank you for your consideration of HB 253 and I urge a favorable report.
