

TESTIMONY IN FAVOR OF SB 560
Animal Testing and Research - Human-Relevant Research Funding and Animal Testing
and Research Licensure

It is so good to see the movement toward animal testing compassion.

I constantly get email information about companies that use animals to test and, of course, I would not buy those products. Seeing what happens to the tested animals and the conditions in which they are kept will upset even those who do not like animals.

Please give this Bill a Favorable vote and show that Maryland cares about animals.

Thank you.
