

HB823 Testimony  
Health and Government Operations Committee  
March 14, 2023  
Joanne Connors, Montgomery County  
POSITION: FAVORABLE

I live with a serious mental illness. Twenty years ago, I lived through numerous hospitalizations due to my lack of insight into my illness. I initially voluntarily went on the meds. But for some reason I stopped taking my medicine believing I no longer needed it.

Assisted Outpatient Treatment would have been so helpful for me. It would have given me the support and structure for staying on my meds and keeping me out of the hospital so many times.

AOT might have saved me from being homeless and spending all my savings to survive without a job. It might have saved my son from being abandoned by his mother.

AOT could only have had positive effects on my life and I wish it had been available 20 years ago when I struggled.

Please give SB480 a favorable report. **I would very much like it to be available if I ever need it in the future.**
