

I am strongly in favor of HB1101. Women deserve a real “choice”. Currently, the laws of the State of Maryland have only one response to a crisis pregnancy: we’ll pay you to kill your child. If the mother would prefer to keep her child but circumstances make that difficult, the State does not care. It’s up to private pregnancy centers to help...these centers go begging for support from kind Marylanders. These days pregnancy centers are under attack by violent thugs who apparently do not want women to have a “choice”. It’s high time the State help these women who want to keep their child. It is the civilized thing to do!
