

HB 147

I am a USAF combat veteran, hold a BS in Public Affairs, MA in counseling.

Balanced Energy policies must provide Marylanders multiple, reliable, and affordable energy choices.

I oppose HB 147 it does not provide a balanced energy policy. Intermittent forms of energy such as wind and solar are a greater threat to people due to the difficulty producing and transporting energy during extreme heat and cold causing more death than any recorded difficulties from fossil fuels. Other countries are producing more pollutants than the United States. We are one of the cleanest energy producers in the world.

The verbiage in HB 147 sounds like the sustainable development goals of Agenda 2030 when the government decides what fuel to produce and whom it will be distributed to in the community based upon a false climate crisis. The World Economic Forum created the climate crisis to control the populace and rule the world under a few select nations. The tactics of the WEF is to create a crisis and then provide a solution which controls the masses. Agenda 2030 and the Bali Declaration of G20, are examples of these strategies. Another example of the over reaching climate agenda is that bugs will be the choice of food for the masses since bugs positively impact the climate crisis. You will own nothing, eat bugs and be happy. See the links below.

Maryland is a breadbasket of food and fuel which can provide bountifully for all Marylanders. Marylanders want equal opportunities to produce and consume energy without the government deciding for us. This plan ultimately removes choices from individuals and hands over control to the government to provide highly regulated expensive fuel to citizens.

Zero emissions is a term which is highly acclaimed for the populace while the "select few" freely fly the globe in their personal jets, fund the military industrial complex, incite global conflict, and promise that all lowly people will own nothing and be happy. Transportation and fuels decided by the government such as fossil fuels become regulated and extremely costly and will only be available for the extremely wealthy.
