

HB00699 FWA – FAVORABLE WITH PROPOSED AMENDMENT

Supporting the amendment to also include USM students.

Cliff McDougall

Reisterstown, MD 21136

HGO Committee - Please vote FAVORABLE ON H.B. 0699 WITH PROPOSED AMENDMENT (FWA) and support Vaccination by Choice Act.

We are Maryland residents who would consider sending our children to The University of Maryland if there were no vaccine mandates. With vaccine mandates still in place, we will look for other school options.

We have family members and friends who have experienced harm from the COVID 19 vaccines. It is overwhelmingly obvious that these vaccines are causing harm through exacerbation of existing conditions, myocarditis and people who seem to faint or die suddenly.

Everything that Big Pharma, main stream media and the government agencies said about this vaccine appears to be a lie – it is at least false.

- “Two weeks did not stop the spread” was a lie.
- They did not have evidence that the vaccine stopped the spread when they claimed it did.
- “Natural immunity is a myth” was a lie - it is helpful and appears to be better than waning vaccine immunity.
- “Masks work to stop the spread” was a lie – there is no scientific proof of this.
- “There are no side effects” was a lie.
- “The vaccine is safe and effective” was a lie – it is not either.

There should be no mandate for these vaccines and we should guard our freedoms close and remove mandates like these that have been forced on the American people.

Thank you,

Cliff McDougall
