

HB699 State and Local Government – Proof of Vaccination - Prohibition

POSITION – Favorable with Amendment

It is now a fact that science now support natural immunity against COVID!

As a person who experienced COVID infection and still have high natural immunities more than a year later, I do not believe any person should lose their job, or child denied entry into school based on vaccination mandates.

In addition, college students were not at high risk for negative outcomes of infection, but were forced to be vaccinated to attend college. I support the amendment that states University of Maryland System **cannot** mandate the vaccine for COVID.
