

It Can Take MORE Than Four.¹

learn more at morenaloxone.com

78% of opioid overdose reversals involved MORE than 4 mg of naloxone.¹

According to the MORE study, a survey of 125 adult bystanders who have administered Narcan[®] (naloxone HCl) Nasal Spray 4 mg.¹

The MORE study answers these questions:¹

- How many doses of Narcan[®] Nasal Spray 4 mg were administered?
- Do people with experience giving naloxone[™] think one box of Narcan[®] is enough?
- Do people with experience giving naloxone prefer a 4mg or an 8mg dose?

Do your patients know that it often takes at least 8 mg of naloxone to reverse an opioid overdose?¹

“ Now with fentanyl, it's getting trickier. People aren't coming responsive like they used to. It takes more than just one [spray of naloxone nasal spray 4 mg].” - Patient Participant, MORE study¹
