

Nancy Dall
In FAVOR of HJ0002

Members of the committee, our constitutional republic is in jeopardy. We are letting our federal government take away our freedoms.

Censorship, for one, and under the guise of “for the better good” is how totalitarianism begins. I believe our federal government and our media together, unlawfully, are using their power to smother any opposing views, thwarting any debate! China, Eastern Europe, Cuba and now Brazil...history has given us warning signals and this one is blaring at us.

I believe our system of controls are being eaten away and disregarded, and that ultimately, the States will follow and states' rights will also disappear under a one world government. It would be naive to think that this county could preserve our freedoms and inalienable rights if we do not take action.

You, right now, have the opportunity to use our constitution to protect our constitution. Holding a Convention of States is a constitutional right, not some concocted notion. Any fear or hesitation should be outweighed by the degree of what we have to lose. I think the clock is ticking.

Please vote in favor of this resolution so it can pass to the floor for a full debate. Thank you.
