

I respectfully urge the committee to pass SB229, allowing for the authorization, use and penalties of and for Noise Abatement Monitoring Systems. I am a retired senior living in a once quiet residential neighbor in North College Park. I have lived here for more than 43 years. Although, my home is one street away from the Capital Beltway (495), I have always been able to get a restful night's sleep. NOT NOW. The constant noise-day and night- from these so called performance (I call them loud) mufflers has become simply overwhelming. Despite efforts by the City of College Park, along with state and county law enforcement, this issue has only gotten worse. I again urge the committee to pass this legislation as soon as possible.

Sincerely,

Philip Aronson
