

Good afternoon,

My name is Jahan Manokey and I'm in favor of HB1180 with amendments that allows for retroactivity for individuals who are currently in prison on the charge of FM, who are not the principle. This law is unjust and unfair. There are plenty of cases of people who are in prison for life and did not have anything to do with the crime. I truly believe that charging someone with a murder that they did not commit is extremely unlawful that affects a lot of people. I believe that you should not hold the many for one person's actions. FM rule is a rule that is more about being guilty by association then punishing someone for their wrongful actions. I do believe that any crime should be punished, but only make the punishments fit the crime.

Thank you for your time today
