Re: **Support of SB 262 - Environment - On-Farm Composting Facilities - Permit Exemption**

On behalf of our Farm Bureau member families in Maryland, I submit this written testimony in support of SB 262. As amended, this bill requires the Maryland Department of the Environment (MDE) to establish an exemption, by regulation, from the permitting requirements under the Code of Maryland Regulations (COMAR) 26.04.11.06 for an on-farm composting facility that (1) uses 10,000 square feet of area or less for active food scrap composting; (2) composts only one or more of a specified list of feedstocks; (3) records the amount and source of feedstock composted, records the date and time the feedstock arrives on the farm, and retains the records for three years; and (4) meets any other conditions specified in regulations. The bill establishes several other related requirements.

Current regulations limit a farmer to up to 5,000 square feet for on-farm composting. As amended, this bill looks to increase that to 10,000 square feet and allow the incorporation of food scraps to the feedstock used in the compost pile. To meet the new demand for removing food scraps from the landfill, farmers will need to do their part to assist. However, being limited to 5,000 sf before mandating extensive and expensive permitting requirements, prevents most farmers from being able to participate. **MDFB Supports this version of the two cross-filed bills as it clarifies several areas of concern that the House version didn't.**

**MDFB Policy:** We support the right for Maryland farmers to make and process mulch and compost from both on and off the farm sources.

**MARYLAND FARM BUREAU SUPPORTS SB 262 & REQUESTS A FAVORABLE REPORT**
