HB0756 Written Testimony

The insidious nature of the firearms bills this session necessitate this bill. The Maryland general assembly is fawning over itself to restrict the legal wear and carry of firearms by lay abiding citizens that it will be very easy to accidentally run afoul of the law. Gun control advocates are losing court case after court case across the country. Rights that were previously legislated away are returning and this bill will protect the citizens of Maryland from overly zealous legislators and law enforcement. When the judicial system eventually sides with the gun owner, this will restore their ability to freely exercise their second amendment rights. I know that is what I would want were it to happen to me.

The job of the legislature is not to pursue an agenda, but to protect our rights. Your oath of office demands that you return a favorable review of this bill.
