

Hi my name is Xavier Price and I'm unfavorable to House bill 824. This bill is only affecting those that are responsible and lawful firearm owners. You will still have those that are going to be unlawfully carrying and do things without questioning their actions because at that point they don't have anything to lose. The only thing you would be doing is causing those that went through the training and obtaining the knowledge to lawfully carry to decide to either break the law and be able to stay protected due to people unlawfully carrying or not follow the law and take the chance of possibly having a person that's unlawfully carrying and threatening our lives. To be honest I have a 2 year old child to get back to at the end of the day. It's my duty to protect not only myself but my family. So don't take the availability to do so away from me and others.
